To Whom It May Concern:

I am writing in support of Set Point Tennis's (SPT) application to engage fathers.

National Fatherhood Initiative (NFI) has been working extensively in the fatherhood field since 1994 and has the only evidence-based program for incarcerated fathers called InsideOut Dad®. NFI's community-based program called 24/7 Dad® is also evidence-based and is the most widely-used fatherhood curriculum in the United States.

NFI is excited to partner with SPT to implement these two fatherhood programs that will help men be involved, responsible, and committed fathers.

NFI has been impressed with SPT's approach and commitment to helping men be the best dads they can be and is confident they have the experience needed to implement these programs successfully.

Sincerely,

Erik J. Vecere
Chief Program Officer
